Device and cover plate customizations

Vimar laser technology allows the reproduction of any name, logotype or trademark, with absolute precision and indelebility, even for small quantities. The following symbols are laser engraved:

- all symbols of the **articles present in this catalogue**;
- **the symbols and wordings** underneath; to order them, the desired article reference is to be completed with the relevant code of the desired symbol or wording (i.e. 14001.01 = 1P 16 A 1-way switch with .01 symbol)
- **symbols, logotypes or trademarks on request**: send, with the order, the black and white image to reproduce, 2-3 times larger than the desired dimension. In case of articles with standard symbol, it should be indicated if what requested is in addition to or in place of the standard symbols.

Warnings

Laser customization advantages:

- indelible engraving that does not deteriorate over time;
- high-precision reproduction even of very fine lines and complex images;
- service available even for minimal quantities;
- possibility of ordering the same customization at different times with identical results, because all customizations are stored on magnetic supports.

The few limits of technology:

- it is not possible to reproduce coloured images;
- **for Plana Silver only the following articles are customizable: 14021.G.SL, 14022.G.SL and 14023.G.SL;**
- **the following technopolymer cover plates are not customizable: iridescent brown (23), polished gold (24), matt gold (25), ash (31), fir (32), makoré (33);**
- **for wooden and metal cover plate customization: prices and quantities agreed with the commercial networks.**

What to supply:

- a printout or transparency of the image to be reproduced, in black-and-white line drawing scaled 2 or 3 times larger than the finished size;
- the image may also be supplied on magnetic support, together with hard copy: DOS or MAC diskette with images in EPS or TIFF format (consult your printer or graphic artist);
- for button engravings, make sure that the desired symbol or label is not already included in the table 'Standard symbols and wordings'; if so, simply indicate the corresponding code in addition to the article code in your order.

Things to avoid:

- do not provide photocopies;
- do not fax the image to be reproduced, since the low definition of the fax makes it impossible to reproduce the document in laser quantity.

How to proceed:

- photocopy this page and fill it in carefully;
- enclose the image to be reproduced, without using paper clips, staples or adhesive tapes;
- to reproduce the symbols and wordings of the table beside on devices, the desired article reference is to be completed with the code of the desired symbol or word (i.e. 14001.54 = 1P 16 AX 1-way switch with 54-symbol);
- deliver all the documentation to your area wholesaler/distributor, who will then forward it to Vimar.

Estimated lead times for devices and cover plates

- 10 working days for the sample;
- 10 working days from confirmation for completed order.

Estimated lead times for Smart card

- 15 working days for the sample;
- 20 working days from confirmation for completed order.
